FILING RECEIPT

OC000000018997856

Date Mailed: 05/31/2006

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Applicant(s)

Olivier Charrois, Paris, FRANCE;

Power of Attorney: The patent practitioners associated with Customer Number 466.

Domestic Priority data as claimed by applicant

This application is a 371 of PCT/FR04/00044 01/12/2004

(54) Title: IMPLANT AND ARTICULAR PROSTHESIS COMPRISING SAID IMPLANT

(54) Titre : IMPLANT ET PROTHESE ARTICULAIRE LE COMPRENANT

(57) Abstract: An implant for an articular prosthesis comprising a first part (3) made of a polymer material defining a cavity (4) in which a second part (7) made of a ceramic material is accommodated, defining a cavity (8) which is essentially hemispherical in shape and which receives the head (2) of a second implant also comprising a rod (1), characterized in that the edge (10) of the second part (7) is buried in the first part (3) which is produced by duplicate moulding on the second part (7), also characterized in that the edge (9) of the first part (3) is provided with a chamfer (11) against which the rod (1) of the second implant is thrust. An articular prosthesis comprising a first implant and a second implant comprising a rod (1) which is terminated by substantially spherical head (2) which turns in a cavity (8) whose shape corresponds to that of the first implant, characterized in that the first implant is of the previous type.
